RE100 Global Policy Message

RE100 members look to policymakers to enact the following policy measures to support corporate sourcing of renewable electricity:

1. Create a level playing field on which renewable electricity competes fairly with fossil-fuel electricity and reflects the cost-competitiveness of renewable electricity.

2. Remove regulatory barriers and implement stable frameworks to facilitate the uptake of corporate renewable electricity sourcing.

3. Create an electricity market structure that allows for direct trade between corporate buyers of all sizes and renewable electricity suppliers.

4. Work with utilities or electricity suppliers to provide options for corporate renewable electricity sourcing.

5. Promote direct investments in on-site and off-site renewable electricity projects

6. Support a credible and transparent system for issuing, tracking, and certifying competitively priced Environmental Attribute Certificates (EACs).
