

## RE100 Global Policy Message

RE100 members look to policymakers to enact the following policy measures to support corporate sourcing of renewable electricity<sup>1</sup>:

- 1. Create a **level playing field** on which renewable electricity competes fairly with fossil-fuel electricity and **reflects the cost-competitiveness of renewable electricity.**
- 2. Remove regulatory barriers and implement stable frameworks to facilitate the uptake of corporate renewable electricity sourcing.
- 3. Create an **electricity market structure** that allows for **direct trade** between corporate buyers of all sizes and renewable electricity suppliers.
- 4. **Work with utilities or electricity suppliers** to provide options for corporate renewable electricity sourcing.
- 5. **Promote direct investments** in on-site and off-site renewable electricity projects
- 6. Support a **credible and transparent system** for issuing, tracking, and certifying competitively priced **Environmental Attribute Certificates (EACs)**.

<sup>&</sup>lt;sup>1</sup> These asks build on two documents: 2018 <u>IRENA CEM Corporate Sourcing of Renewables</u> and the <u>Buyers' Principles</u>
